About Us

ITD GrowthLabs is a growth-focused digital and technology partner specializing in **application development, web solutions, and digital platforms.**

With over **10+ years of combined experience**, we help businesses **design, develop**, and scale high-performance digital products across industries and global markets.

Our approach is simple:

- Understand business goals
- Build scalable solutions
- Deliver measurable outcomes

We work with **startups, SMEs, and enterprises** to create solutions that are not just functional, but built for growth.

What We Do

We provide end-to-end application development services:

Web Application Development

- Custom business applications
- SaaS platforms
- Admin dashboards
- CRM & ERP solutions

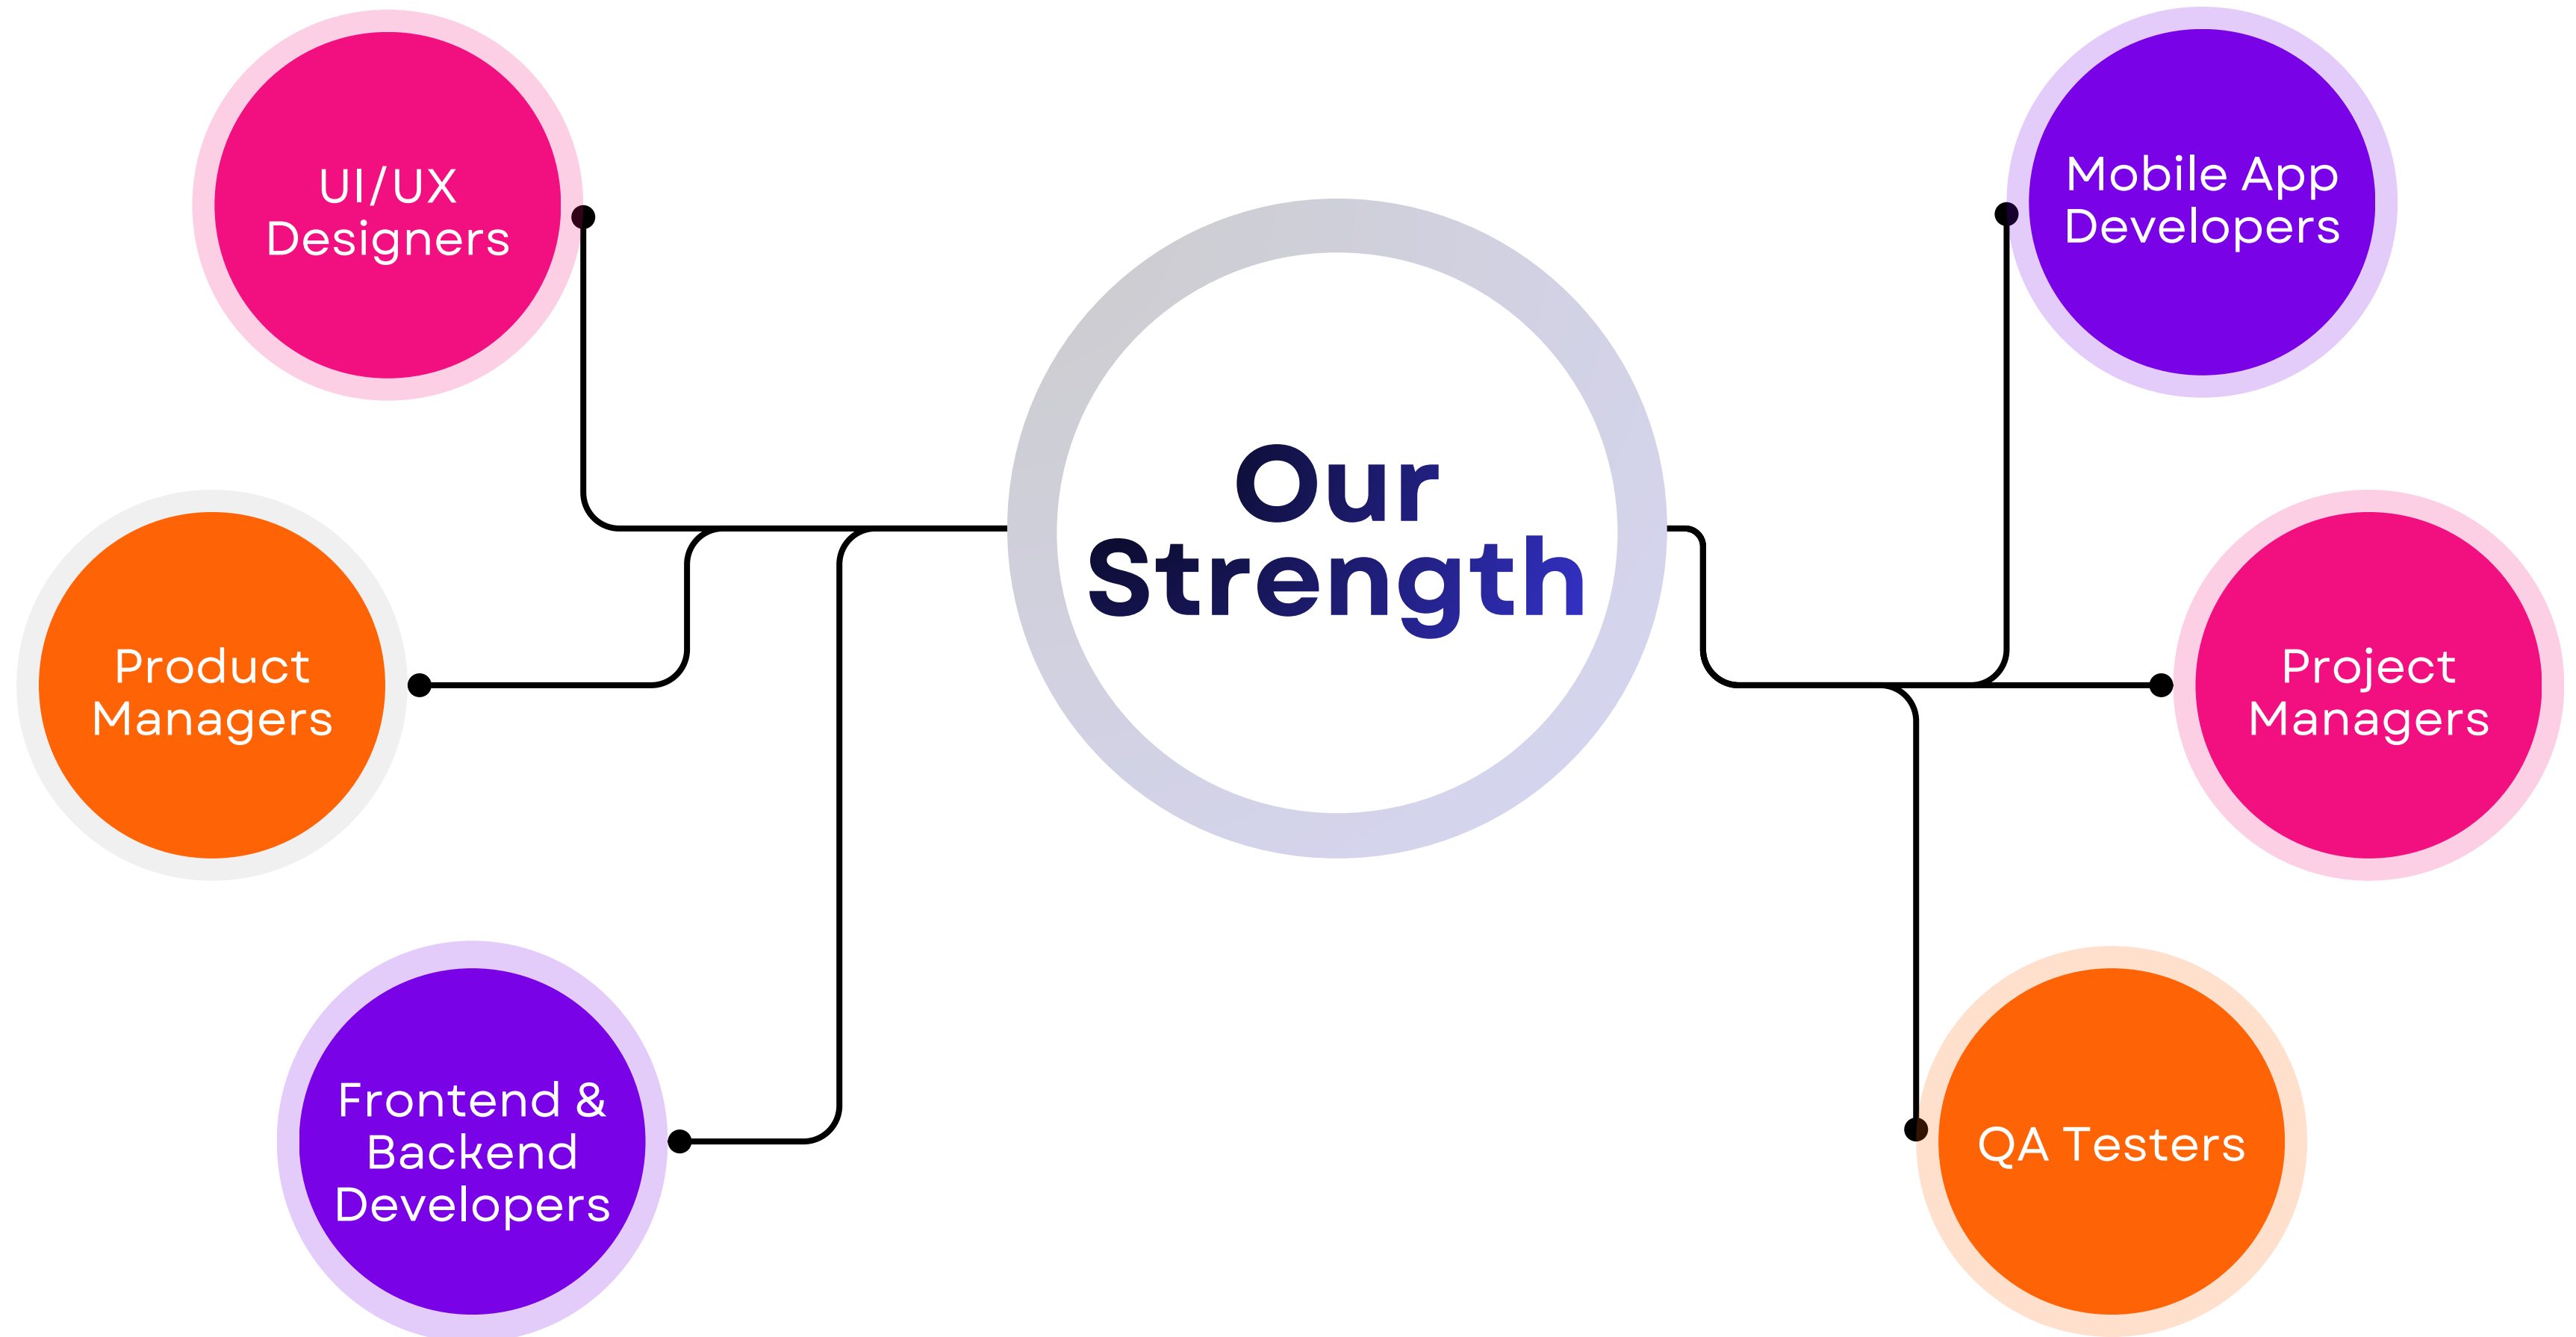

Mobile Application Development

- Android applications
- iOS applications
- Cross-platform apps (Flutter, React Native)

Custom Software Development

- Workflow automation tools
- Logistics & operations platforms
- Industry-specific solutions

We are backed by a strong in-house team of **55+ professionals**, including:

Our Strength

What This Means for You

AWS

Firebase

Our Approach

We follow a structured development process:

1. Requirement Understanding

2. Solution Planning & Wireframing

3. UI/UX Design

4. Development & Integration

5. Testing & Quality Assurance

6. Deployment & Support

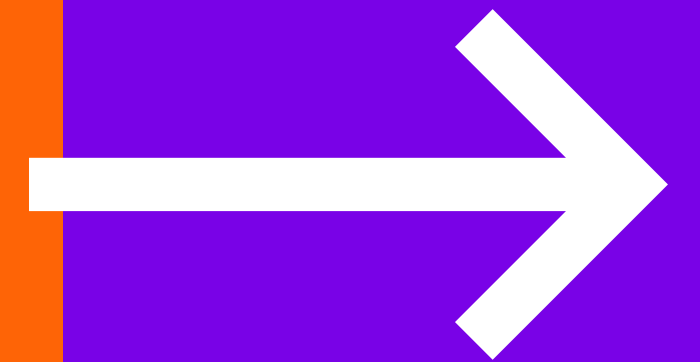

This ensures clarity, transparency, and consistent delivery.

Why Choose ITD GrowthLabs

We focus on building **long-term technology partnerships**, not just delivering projects.

- 10+ years of experience in digital solutions
- Strong in-house team (55+ members)
- Scalable and future-ready architecture
- Focus on performance and usability
- Ability to manage complex and large-scale projects
- Global service capability

Work & Capabilities

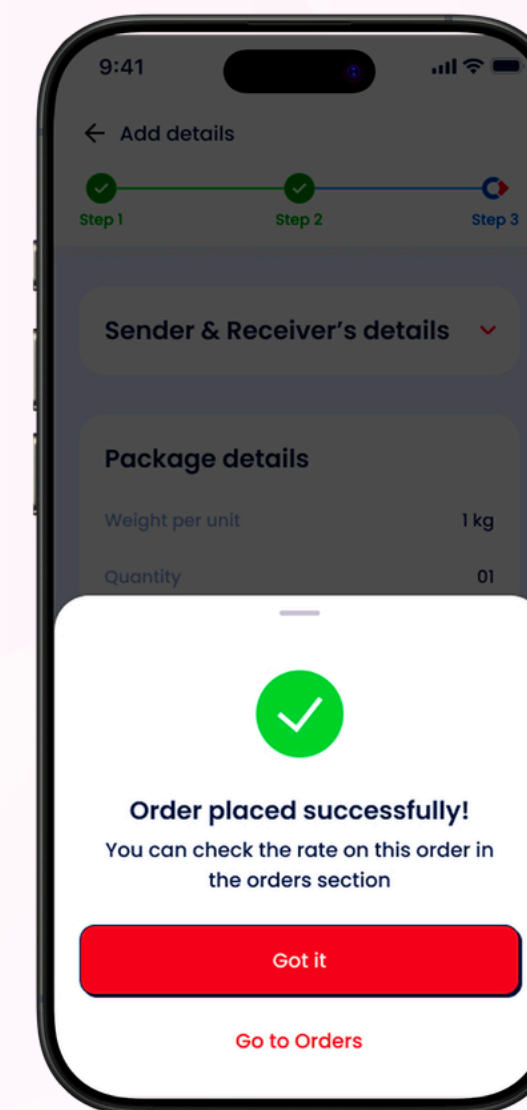

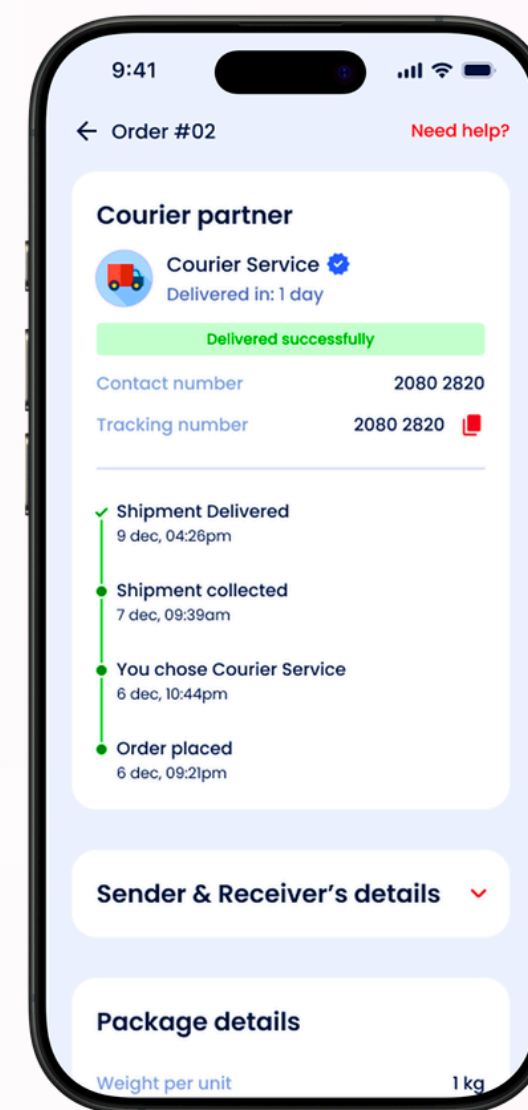

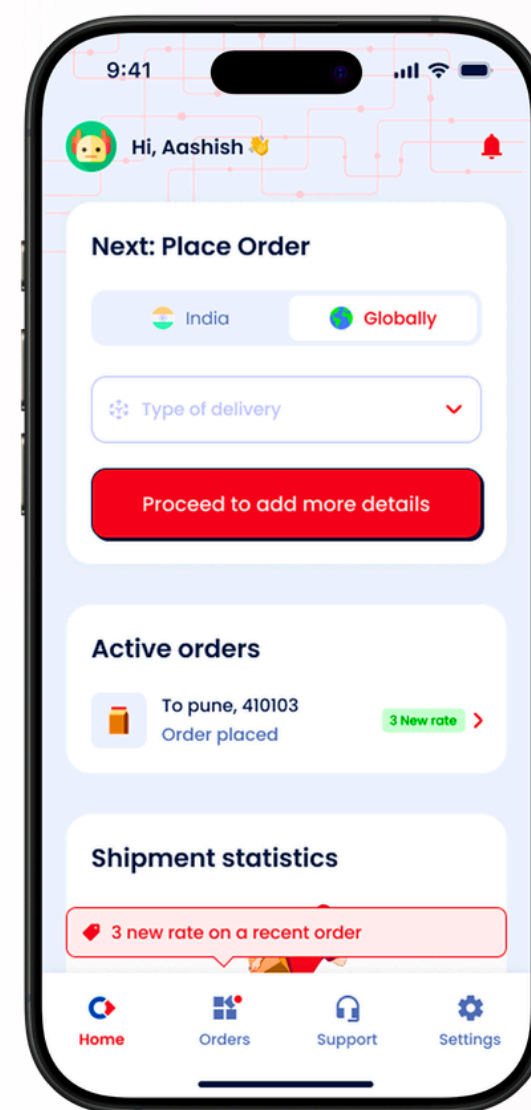

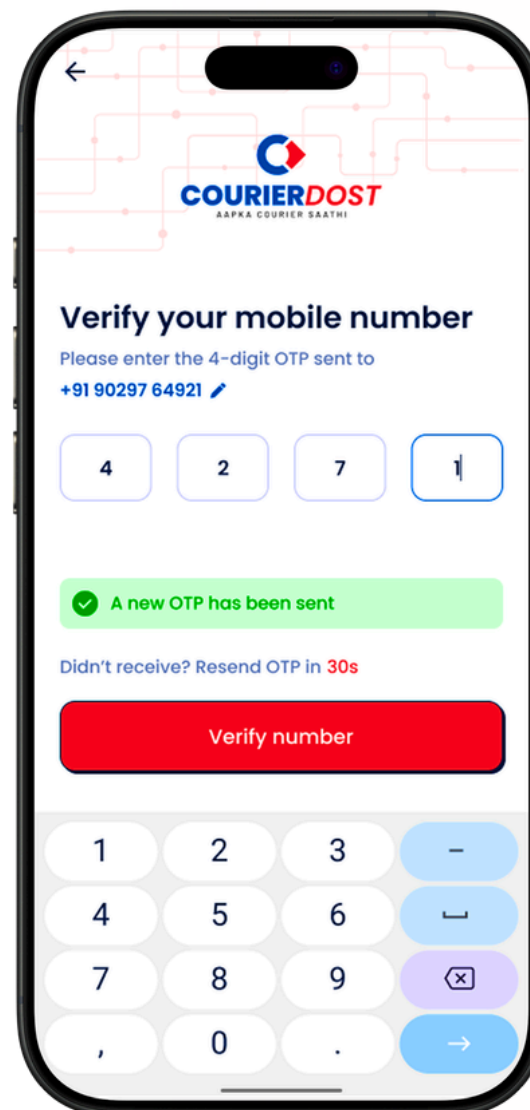

Case Study / Solution Showcase

Industry: Logistics

On-Demand Courier Booking & Delivery Application

We developed an on-demand courier application that connects customers with nearby courier partners, enabling faster, more efficient deliveries.

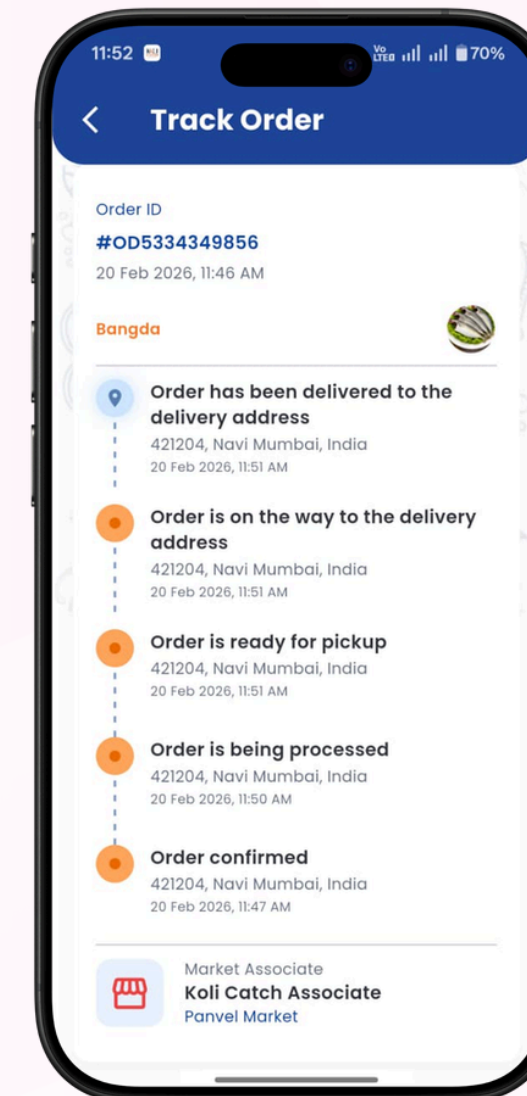

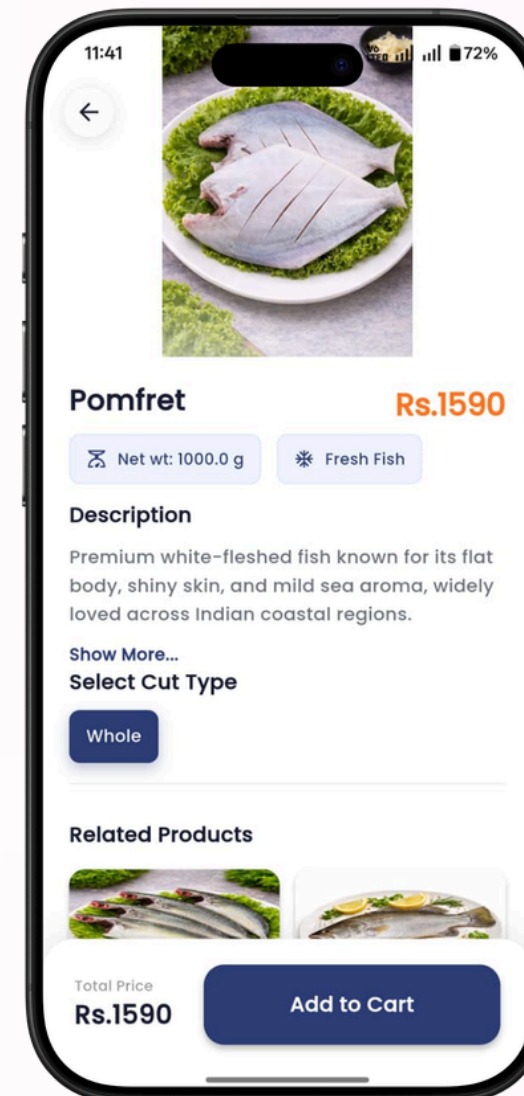

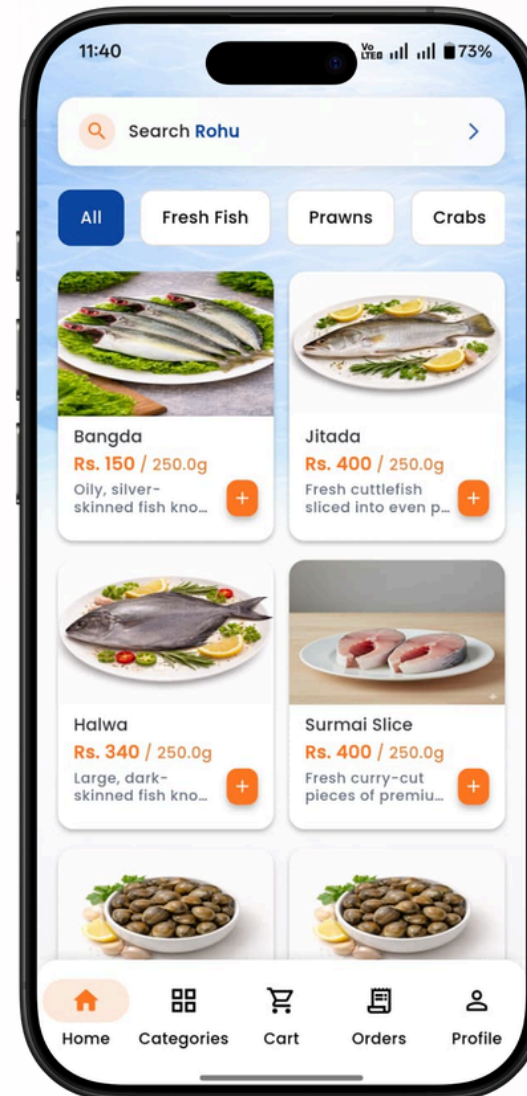

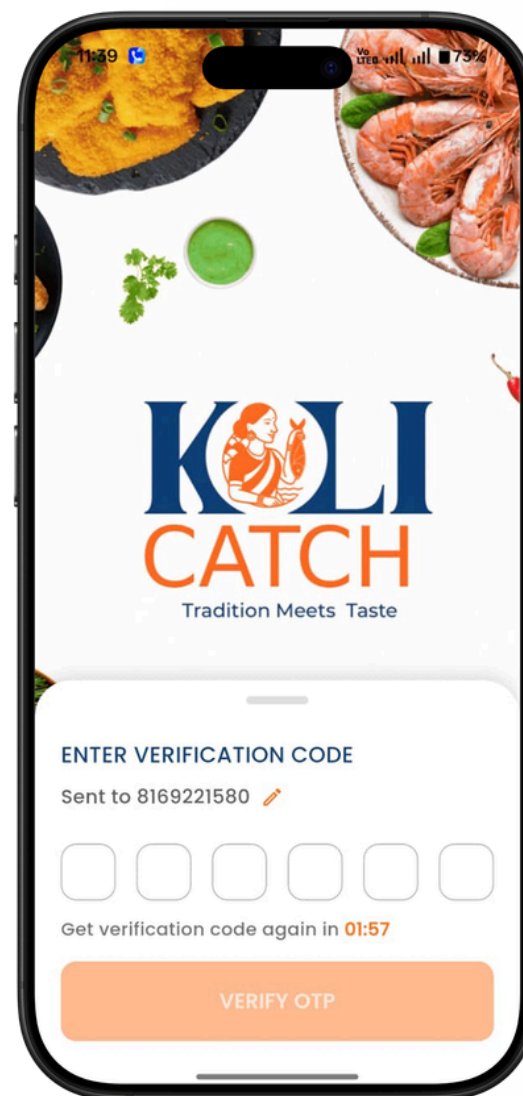

Case Study / Solution Showcase

Online Fish Delivery & Marketplace Application

Industry:
Food & Delivery / Hyperlocal
Marketplace

An on-demand seafood ordering platform that connects customers with nearby fish markets, enabling easy ordering and doorstep delivery.

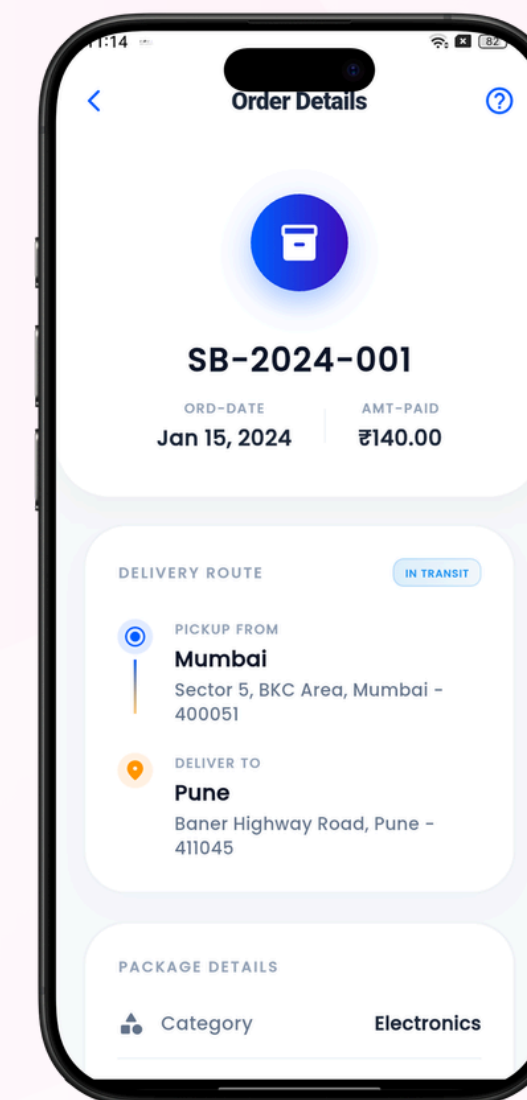

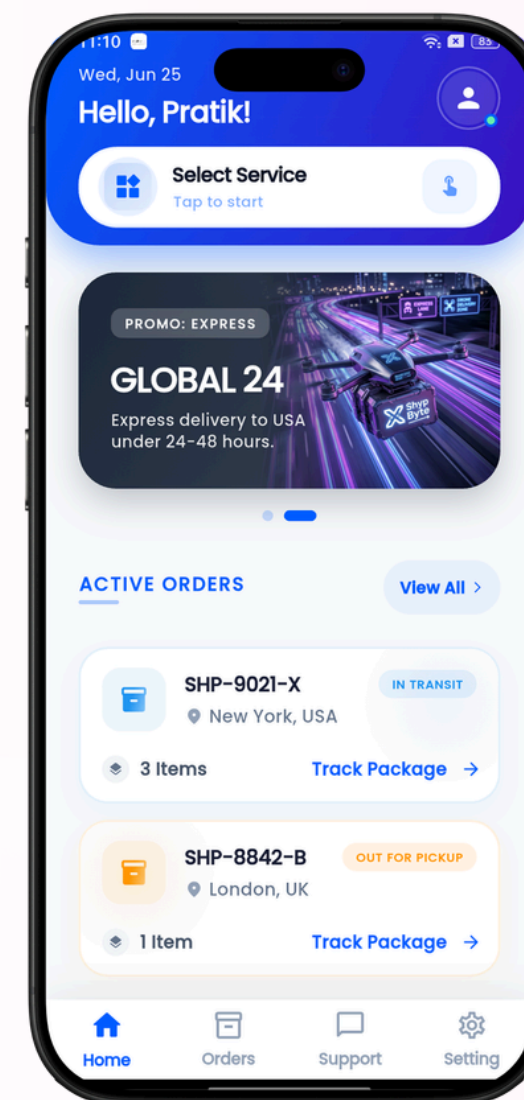

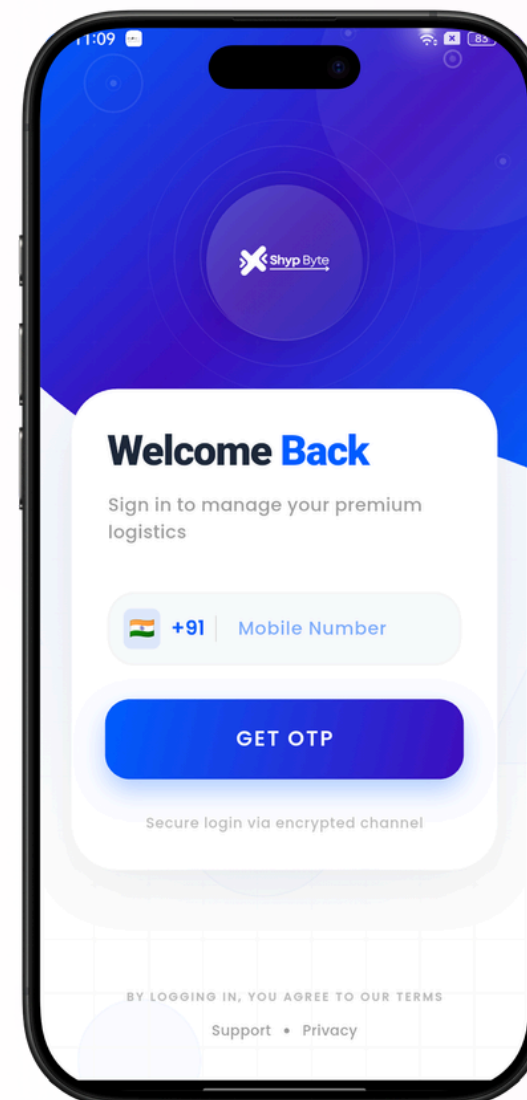

Case Study / Solution Showcase

Industry: Logistics

Smart Logistics Platform for Rate Comparison, Booking & End-to-End Delivery Management

We developed a centralized logistics platform that aggregates multiple courier options, enabling users to compare rates, select the best option, and manage the complete shipment lifecycle.

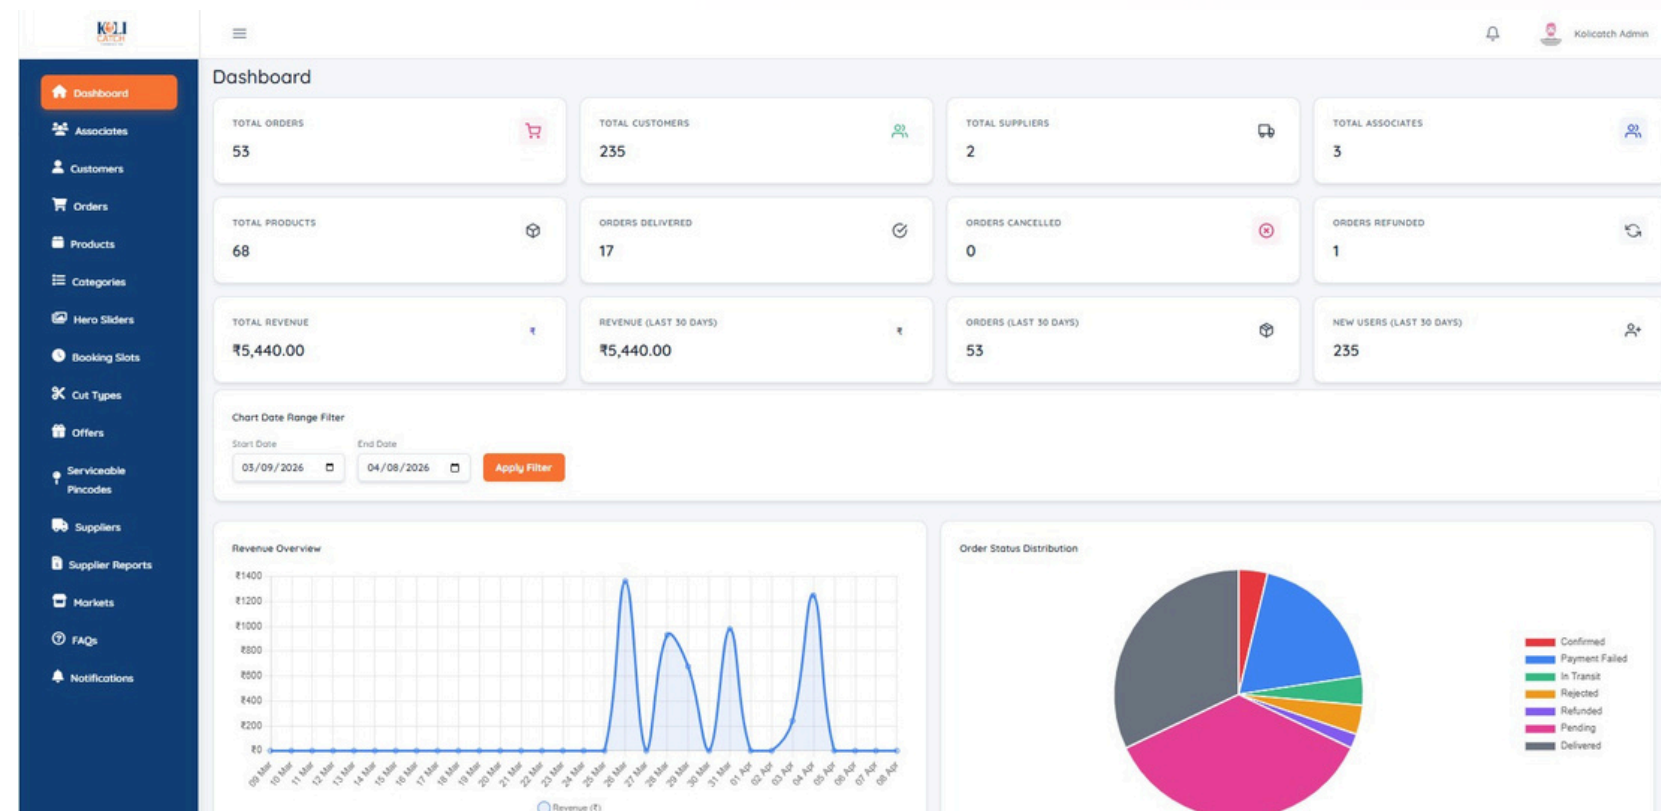

Case Study / Solution Showcase

Vendor & Operations Management System for Food Delivery Platform

Industry:
Food & Delivery / Hyperlocal
Marketplace

A powerful vendor and admin platform designed to help businesses manage orders, track deliveries, assign tasks, and control operations from a centralized dashboard.

Courier Management System (Web Application)

Industry: Logistics

A comprehensive web-based system designed for courier companies to manage orders, vendors, invoicing, payouts, and sales operations from a single dashboard.

The screenshot displays the 'Order #CD6254346272' page in the Courier Management System. The interface includes a sidebar menu on the left with options like Dashboard, Orders, Customers, Vendors, Administration, Type of Services, Courier Partners, Shipping Modes, Package Types, Order Contents, Promocodes, Vendor Wishlists, Vendor Bank Accounts, FAQs, Payouts, Sales Invoices, Suspension Reasons, Notifications, and Banners. The main content area shows order details for a 'Domestic Courier Service' that is 'Delivered'. The order was created on 14/03/2026 at 12:34 AM and updated on 17/03/2026 at 02:50 PM. The sender is Bridgelabz HR Rohan Mokashi, and the receiver is Prashanth S. The package is a document, shipped via Air, with a weight of 1.0 Kg. The pickup was assigned to Ravi prakash (RAVI LOGISTICS & COURIER SERVICE) on 14/03/2026 at 12:00 PM. Action buttons for 'Back', 'Payout to Vendor', and 'View Invoice' are visible at the top right of the order details section.
